## Mayor approves £175m Old Oak regeneration

Genesis Housing Association and Queens Park Rangers Football Club (QPR) have welcomed the decision this week by the Mayor of London to approve their £175 million mixed use 'Oaklands' development, the first major scheme to get the go-ahead in the Old Oak regeneration area.

The scheme will deliver 605 new homes, 40 per cent of which will be affordable. It will also provide hundreds of new jobs and a link road into Old Oak, opening up the wider area to regeneration.

Ultimately, 25,500 new homes and 65,000 new jobs could be provided at Old Oak and Park Royal over the next 30-40 years – as well as being the key transport interchange for Crossrail and HS2.

Neil Hadden, Chief Executive at Genesis Housing Association, said:

*"We are delighted that the redevelopment at Oaklands, in one of Hammersmith and Fulham's most important regeneration sites, has been approved. We will now be able to provide hundreds more affordable homes for Londoners on a once derelict site.*

*"Partnerships such as the one we have with QPR enable us to invest, not only in building new homes, but in developing new communities."*

Genesis and QPR have agreed to work together to deliver this first development at Old Oak. Genesis controls the Oaklands site. QPR has other strategic land interests in Old Oak and would like to build a new stadium as part of the wider development, providing a new home for the Club. Tony Fernandes, co-Chairman of QPR, added:

*"We are delighted that the Mayor has granted planning permissions for the Oaklands development, including hundreds of affordable homes for Londoners. Along with our*

*development partners Genesis Housing Association we look forward to creating this new neighbourhood, building a sustainable community where people can live, work and play.*

*“We are committed to bringing forward other development sites in Old Oak as soon as possible to create the homes that London desperately needs. All this will help us achieve our ultimate goal, which is to secure the future of the club through the construction of a new stadium with sporting, community and educational facilities.”*

### Scheme details

The Oaklands site is located on the western part of the Old Oak regeneration area, south of the Grand Union Canal. It is currently a vacant site that has been unoccupied for 10 years. It was previously used as offices and a hostel. The plans will transform this unknown and disused area, generating a pleasant new neighbourhood for people to live, work and play. It will provide:

- Over **600 new homes** with a mix of shared ownership, affordable rent and social rent homes and a range of apartments to suit different needs and budgets.
- The start of an important **new link road** from Old Oak Common Lane into the site. As neighbouring sites are developed, this road can be extended into the heart of the new Old Oak Common regeneration area.
- **Hundreds of new jobs** in a vibrant new entrepreneurial community, with a 40,000 sq ft creative hub aimed at attracting companies from the new high tech economy.
- Extensive **landscaped public areas** will provide an attract environment and setting for the development along with communal space for the new residents.
- High standards of **energy efficiency** using low carbon technology will be incorporated throughout the scheme.

Demolition of the existing site buildings will start later this year and construction work is expected to take three years to fully complete.

Note to Editors

## **About the team**

### **About Genesis**

At any one time over 100,000 people live in a Genesis home.

They own and manage approximately 33,000 homes across London, the South East and the East of England. They create and sustain communities, building and managing homes for social rent, market rent, shared ownership and private sale. They also provide care and support services to over 4500 people.

To find out more about Genesis Housing Association visit: [www.genesisha.org.uk](http://www.genesisha.org.uk)

### **About QPR**

Queens Park Rangers Football Club has been based in West London for over 130 years. The club would like to move into Old Oak, building a world class new stadium as well as providing a proper home for its well established community outreach activity. QPR have acquired strategic land interests throughout the Old Oak regeneration area for both the stadium and associated enabling works.

QPR's joint venture partner is **Stadium Capital Holdings. SCH** delivered the Emirates Stadium regeneration, which included 3,500 new homes, 60,000 sq ft of hi-tech commercial space, and a cutting edge waste and recycling centre. They operate The Studios, which is an innovative complex of flexible business space aimed at the hi-tech and creative sectors.

QPR's property advisers are **Anthony Green & Spencer**, a specialist regeneration consultancy, who previously identified the site for the Emirates Stadium, and advised throughout its acquisition, planning, funding and development.

The Oaklands scheme is being designed by **CZWG Architects** who have 40 years' experience of pioneering imaginative and innovative architecture based upon simple, practical ideas which aim to provide memorable architecture that is a pleasure to live or work in.

## **About the Old Oak and Park Royal opportunity area**

The scheme will be within the wider Old Oak and Park Royal regeneration area. Old Oak is identified as a major regeneration opportunity that could create 25,500 new homes and 65,000 new jobs over the next 30-40 years.

As a Mayoral Development Corporation, Old Oak and Park Royal Development Corporation (OPDC) has been established to work with the local Boroughs and other stakeholders to co-ordinate the planning, development and regeneration and ensure that transport and community infrastructure is delivered alongside new homes and jobs.

Millions of pounds will be spent on improving public transport with a new station for HS2 and Crossrail, and new London Overground stations as well as increasing the capacity of existing stations at Willesden Junction and North Acton.

OPDC is currently working up a draft Local Plan and 'masterplan' for the entire area which will set out how they would like to see development brought forward.
